Russian: Intermediate

PROFILE

Junior Frontend Developer with hands-on experience in building modern and responsive web applications using React, TypeScript, JavaScript, HTML, CSS, and Redux. Experienced in developing user-friendly interfaces and implementing clean, maintainable code following modern web development practices.

Worked on several practical projects, including a Facebook-like social media interface, a design studio website, a Tic Tac Toe game, a to-do list application, and a movie website. These projects demonstrate skills in component-based architecture, state management, responsive design, and interactive UI development.

Developed a design studio website that showcases services such as naming, branding, and design solutions. The website focuses on clear structure, responsive layout, and intuitive navigation to provide users with a smooth and engaging browsing experience.

Passionate about creating clean, responsive, and visually appealing interfaces, with a strong commitment to continuous learning and improving development skills.

EXPERIENCE

Frontend Intern

SmartCode | 3 Months

- Developed a responsive bicycle shop website page with a clean layout and modern UI design.
- Built a To-Do List application using JavaScript and React, implementing dynamic task management and state updates.
- Created an interactive Tic-Tac-Toe (X-O) game with functional game logic and user interaction.
- Designed a football club website page inspired by Real Madrid, focusing on structured content and modern layout.
- Built a prototype website inspired by BMW, emphasizing clean UI design and visual presentation.
- Developed a design studio website that showcases creative services such as naming, branding, and design solutions, featuring a modern layout, responsive design, and clear navigation to improve user experience.
